Create a College Email Address

- * Your daughter should have created one email address to use for all of her college communication.
- * Have her write down her address and password.
 - * Put it somewhere safe, but can be found
- * *Make sure it is professional.*

Name & Social Security Card

- * When registering for tests, it is crucial that your daughter spells her name exactly as it appears on her social security card.
- * When there is a conflict in spelling, scores may not reach colleges in time or get matched to their application.
- * If a student uses a nickname, colleges might think it is 2 different people.

Paying for College

- * **Be honest and realistic - Do your Research**
 - * What can your family afford? What debt are you willing to accept? Have the conversation!

- * **NET PRICE** is the amount that a student pays to attend an institution in a single academic year **AFTER** subtracting scholarships and grants the student receives.

Focus on the **NET PRICE** - Not the **STICKER Price**.
Net Price Calculator on College Websites

Available on a college's website, net price calculators can help prospective students get a better handle on what they will be expected to pay. Students enter information about their family's financial situation to learn what similar students paid to attend the institution in the previous year.
